A Community driven WhatsApp Group

Key organisations within the village have come together to support a new 'messaging out' WhatsApp Group.

Named: **IM Village Community**

Each community group will have full administration rights, giving them access to easily and efficiently post out about their upcoming events, news, emergencies and lots more.

The connection of all these groups within Iwerne Minster is about harnessing a shared interest and that is our village community.

Join us now by following the link shown here, alternatively you will be contacted by your various Presidents, Chairperson or business owners asking you to sign up. Or contact the team via email: IMvillagecommunity@gmail.com with your mobile number and name.

This WhatsApp group is a 'noticeboard'. It will give you the opportunity to receive information only and can help you remember 'what's on' or coming up. This will also be the route for alerts and information from our village Emergency Response Team in the event of an emergency incident affecting the village.

Please note this is an addition to the other communication tools we already have out there and is not a replacement. There will also be a new village website to add to this list. Both will be driven by the community for the community.
